Before You Begin

- 1. Make sure you have installed the latest version of HealthLink SIX messaging system (HMS version 6.6.x) in your system
- 2. If you are unsure on any of anything or need assistance, please contact the HealthLink Helpdesk on 1800 125 036

Icons used in this guide

You will see helpful icons used in this guide to draw attention to a subject, action, or information.

The light bulb icon indicates information that is likely to make your job easier.

The exclamation icon highlights a warning or an action you need to take. When you see this icon, pay attention, and proceed with caution.

The '*i*' for information icon indicates an area that assists in a decision.

Setting up HealthLink with MD3.14

The Scheduled Document Import (SDI) utility facilities Medical Director with the ability of automatically import messages. The user can configure SDI to run at a regular interval.

How does SDI work

When HealthLink SIX messaging is installed, it creates an interface file called **hms_config.xml** located in the C:\HLINK directory. The interface file contains the file path details for all the incoming and outgoing directories for the different message types. MD3.10 or later looks for this file on the local Computer and uses the file to find the appropriate paths for its messages

How to turn SDI on

1. Click Tools > Manage Communications>General Tab>General

ł,	Manage Communications	
	General Setup Data Transfer	Advanced Pathology
	Import Configuration	
	Import Database	HCN Live Data
	Automatic Import Interval	2 minutes

- 2. Select HCN Live Data for the Import Database drop down box in General tab.
- 3. Select the desired automatic import frequency from **Automatic Import Interval** drop down box.
- 4. Click **Close** to the bottom left of the screen to save the changes.
- 5. A Pop screen will confirm if you will like to save the changes, click **Yes** to confirm changes.
- 6. A screen will pop up advising that the SDI will be tested click on OK for SDI to start trial import.
- 7. When the test is successful Click OK.

Setting up HealthLink imports within MD3

Setting Up HealthLink Advance Options

- 1. Go to Start>All Programs> HealthLink Advance Options
- 2. Click on **Configuration>User Settings**
- 3. Click on Message Types Tab
- 4. Select **LAB2** message type and click on **Messages Stores** tab on lower half of the screen.
- 5. Click on **EDIT/MORE** button and change the **incoming** and **outgoing** file paths. Click on Close button to close the screen.

🕲 Message Directories	×
Outgoing Messages	Incoming Messages
Outgoing Message Directory	Incoming Message Directory
\\servername\HLINK\HL7_out\LAB2	\\servername\HLINK\HL7_in\LAB2
Outgoing Message Error Directory	Incoming Message Error Directory
\\servername\HLINK\HL7_out\LAB2\reject	\\servername\HLINK\HL7_in\LAB2\rejecte
Acknowledgement Messages	Archived Messages
Acknowledgement Message Directory	Outgoing Message Archive Directory
\\servername\HLINK\HL7_in\LAB2	\\servername\HLINK\HL7_out\LAB2\archi\
Acknowledgement Message Error Directory	Incoming Message Archive Directory
\\servername\HLINK\HL7_in\LAB2\rejecte	\\servername\HLINK\HL7_in\LAB2\archive
	Close Cancel

- 6. Make the same changes to **RSDAU**, **PIT**, and **BROADCST** (if in Southern Australia).
- 7. Click on **File>Save All** to save the changes made.
- 8. Click on **File>Exit** to exit out of HealthLink Advance Options.

Setting Up Medical Director Manage Communication

- 1. From the Medical Director's main tool bar choose **Tools > Manage Communication.**
- 2. In General Tab, look up Recognised File extensions list for **REF**.
- 3. If **REF** extension is not in the list, add **.REF** extension to the list.
- 4. Click on **Setup Data Transfer** tab.

- 5. MD3.14 will automatically look at HealthLink Interface file in C:\HLINK
- 6. If HealthLink Six Message was not installed on the C:\ drive then browse to the HLINK folder and select the HealthLink Interface file hms_config.xml
- 7. Click on the Refresh HealthLink Import Path(s) button to load the HealthLink settings. This will populate the Manage Communications settings with HealthLink file paths.
- 8. Click on **Global** check boxes for **LAB2**, **RSDAU**, **PIT** and **BROADCST** (if in Southern Australia).
- 9. Click on ACK boxes for, PIT and BROADCST (if in Southern Australia).
- 10. Click on close button to save changes.
 - *If any changes are made to HMS advanced options, refresh HealthLink import paths(s) from setup data transfer tab for MD3.14 to pick up the settings.*

Setting up the RSDAU messaging

Filing Referrals, Specialist letters, Discharge Summaries

Incoming RSD messages (Referrals, Specialist letters, Discharge Summaries) can be filed in Documents within a patients notes.

To set this up

1. From the main tool bar choose **Tools > Option**, select the **RSD** tab

Op	tions								×
	Lists	Inve	estigations	Network	Links	Prompts	Clinical	History	1
	Gener	al	Prescribin	ig	Progress	notes	Prac	tice	1
	Examina	ition	Drug Support	Device	s PK	I F	RSD	Recall	1
	The Referral, Status and Discharge Summary system allows you to receive electronic status and discharge summaries. Status and Discharge Summary Reports Storage								
		Stored.	reports in the Le	tters tab of th	e Clinical W	/indow			
		- File I	epoits in the Du	ocuments (ap	or the Cirrit	sar window			

- 2. Select File reports as Documents
- 3. Click on Save

Testing Your Configuration

Generating Lab 2 Test Messages

- 1. Open the HealthLink SIX Advanced Options
- 2. From menu click **Utilities>Test Message Generator.** The **Test Message Generator** window will appear.
- 3. Sending and receiving EDI account will automatically fill with the practice EDI.
- 4. To generate **LAB2** messages click on LAB2 from **Message Types available** to you and then on **Generate Test Message** button.

Generating RSDAU Test Messages

- 1. To generate **RSDAU** message click RSDAU from **Message Types available** to you and then click on **Generate Test Message** button.
- 2. Click on File and Exit to close the Healthlink Advanced Options

Making HealthLink Connection Manually

1. From system tray right click on HealthLink Icon

🕦 🗿 9:26 p.m.

2. Left click on Run Now to make the manual connection.

3. A spinning "H" indicates the HealthLink application has started its connection.

«(@) 9:30 p.m.

4. Once the "H" stops spinning, the HealthLink connection as been completed and the test messages are downloaded into their respective incoming folders for **Medical Director** to import.

Checking Messages in MD3

- 1. To check message into MD3, press the F5 key or alternatively, from the MD3 menu, click **Investigations** > **Check Holding File** (Message import is done automatically if SDI functionality is on)
 - *It* is advisable not to use **F4** key from the keyboard to manual import, since SDI functionality can be scheduled to desired interval to import the diagnostic reports, referrals and discharge summaries automatically.
- 2. Select the name of Doctor for which you want to view the investigation results and click the **OK** button

Ch	Check Holding File					
Г	Select Practitioner(s)

New look inbox in MD 3.14 provides the user with a lot of new options such as Assigning Reports, Deleting one or more messages ect from the preview screen. Message preview can be changed using the Previw button on the top left hand conner.

Appendix

Turning SDI OFF

Click **Tools > Manage Communications** and select *(disabled)* from the Import database drop down box.

Disabling HCN Service Manager

If the practise has started using a new *Clinical Software System*, it is possible that HCN Service Manager may still be running hence pulling the messages out of default Healthlink SIX messaging folders.

To stop messages been pulled by HCN Service Manager. HCN Service Manager needs to be disabled.

This service starts automatically and to stop this service change the **startup type** to "**disabled**".

 Click on Start > Run. In the Run window type "services.msc" and click on OK button.

Run	2	×
	Type the name of a program, folder, document, or Internet resource, and Windows will open it for you.	
Open:	services.msc 🗸	ļ
	OK Cancel Browse)

2- From the service screen look for **HCN Service Manager** and double, left click to open **HCN Service Manager Properties** window as shown below.

HCN Service Mana	ger Properties (Local Computer)
General Log On	Recovery Dependencies
Service name:	HCNServiceManager
Display <u>n</u> ame:	HCN Service Manager
Description:	Host service for multiple servlett plug-ins. If this service is stopped then all plug-ins are also stopped.
Pat <u>h</u> to executabl "C:\Program Files	le: \\Health Communication Network\HCN Service Manager\
Startup typ <u>e</u> : 🤇	Disabled
Service status:	Started
<u>S</u> tart	Stop Pause Resume
You can specify t from here.	he start parameters that apply when you start the service
Start para <u>m</u> eters:	
	OK Cancel Apply

- 3- Select "Disabled" from the Startup type.
- 4- Click "Stop" from the Service status and then click on OK button.
