Integration Guide

Integration Guide

1. Before You Begin

1.1 Icons used in this Guide

You will see helpful icons used in this guide to draw attention to a subject, action or information.

The light bulb icon indicates information that is likely to make your job easier.

The exclamation icon highlights a warning or an action you need to take. When you see this icon, pay attention and proceed with caution.

The 'i' for information icon indicates an area that assists in a decision.

Integration Guide

2. Setting up HealthLink with Shexie

2.1 Shexie set up to receive HL7 and PIT Pathology & Radiology LAB results & HL7 letters

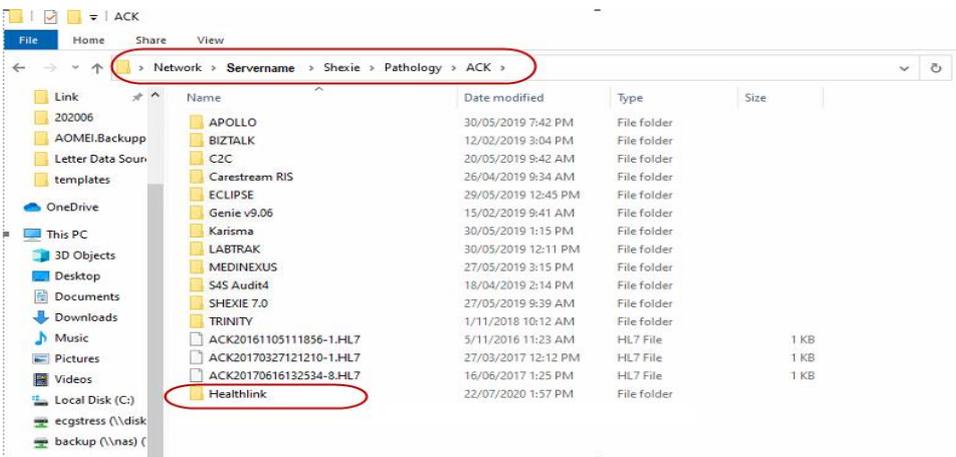

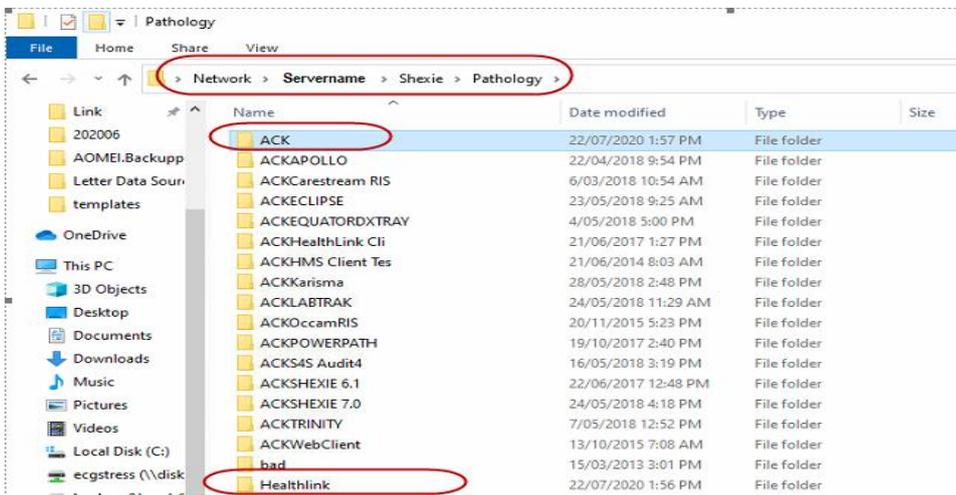

The Directory to receive the Pathology, Radiology results & Letters is usually the folder \\servername\Shexie\Pathology. This Directory is always set by Shexie.

This path may also be mapped to the S: drive as- S:\Pathology

Shexie can create Acknowledgements for LAB2 messages(Pathology and Radiology).So we are creating the following subfolders in \\servername\Shexie\Pathology:

- \\servername\Shexie\Pathology\Healthlink - for LAB2 Imports
- \\servername\Shexie\Pathology\ACK\Healthlink - for LAB2 Acks

Integration Guide

Shexie can now create acknowledgements for RSDAU

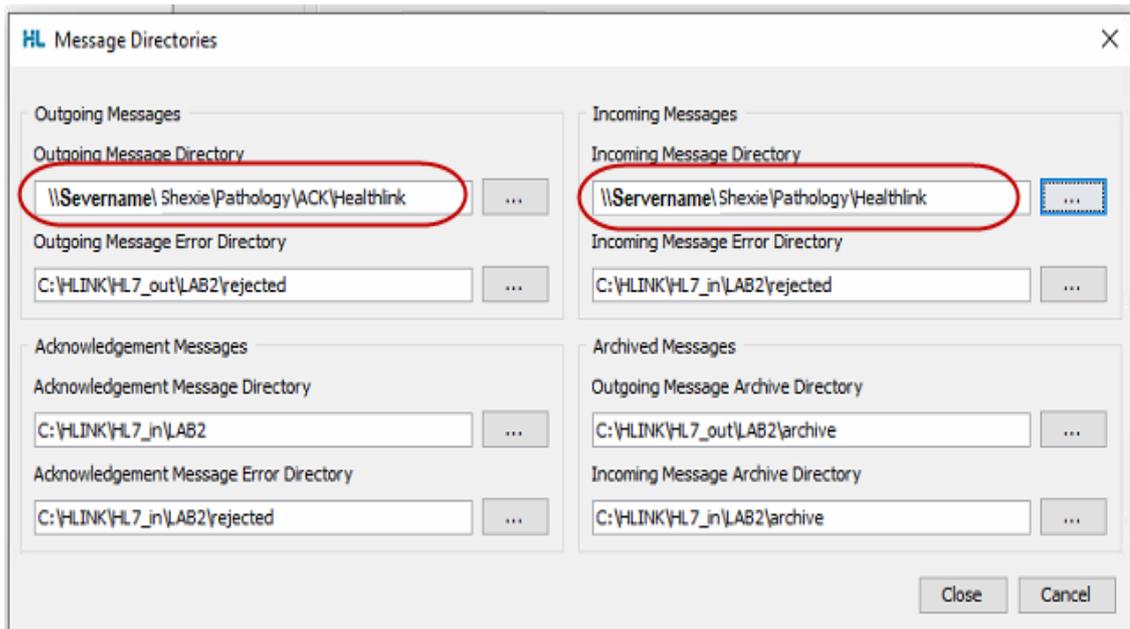

- `\\Servername\Shexie\Pathology\Healthlink` -For RSDAU Imports
- `\\Servername\Shexie\Letters\Healthlink` -For RSDAU Acks

Import Path PIT and BROADCAST messages will be:

- `\\Servername\Shexie\Pathology`

2.2 LAB message configuration

- 1- Open the **HMS Advanced Options**
- 2- Click **Configuration** then **User Settings**
- 3- Click on the **Message Types** tab and scroll down and highlight **LAB2**
- 4- Click on the **Message Stores** tab and click **Edit/More**
- 5- The **Incoming Message Directory** is the only one path that is to be changed.

This can be changed to the required `\\servername\Shexie\Pathology\Healthlink` path or you can browse to the shared folder by clicking on the  button.

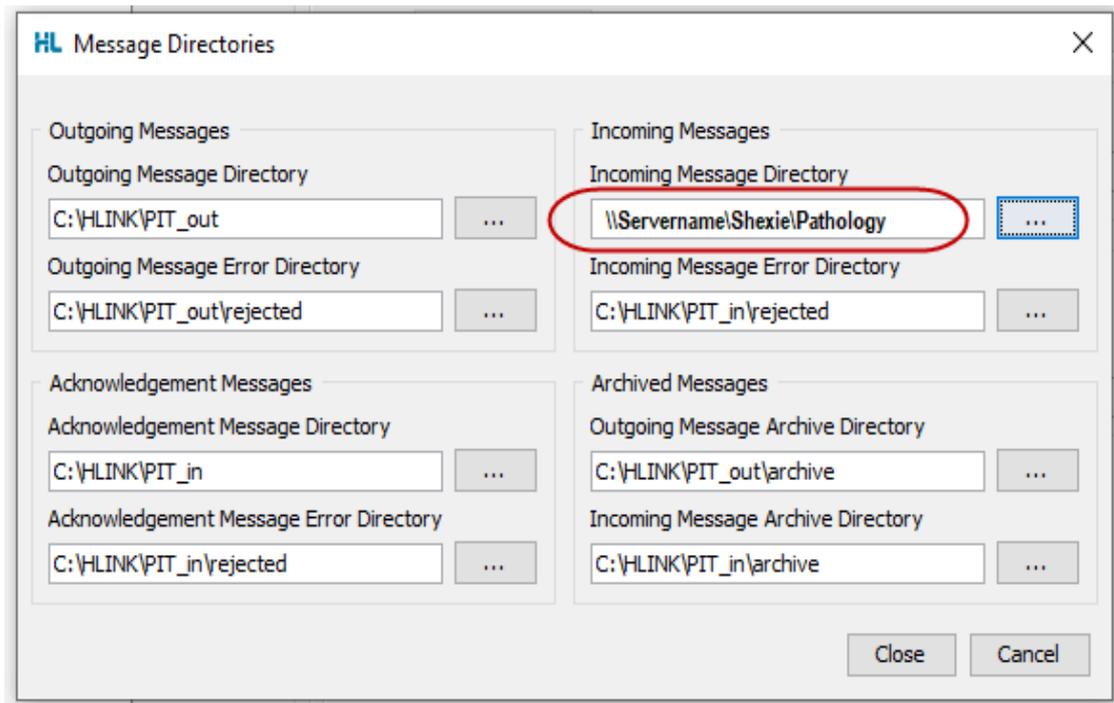

Shexie can acknowledge LAB2 messages, You will only need to setup the incoming paths for LAB2 as per the above screenshot and then Shexie will be able to Export ACKs to the Outgoing LAB2 folder: `\\Servername\Shexie\Pathology\ACK\Healthlink`

To save the changes click on **Close**

Integration Guide

2.3 PIT message configuration

- 1- From in the **HMS Advanced Options**
- 2- Click on the **Message Types** tab and scroll down and highlight **PIT**
- 3- Click on the **Message Stores** tab and click **Edit/More**
- 4- The **Incoming Message Directory** is the only one path that is to be changed.

This can be changed to the required **\\servername\Shexie\Pathology** path or you can browse to the shared folder by clicking on the  button.

To save the changes click on **Close**

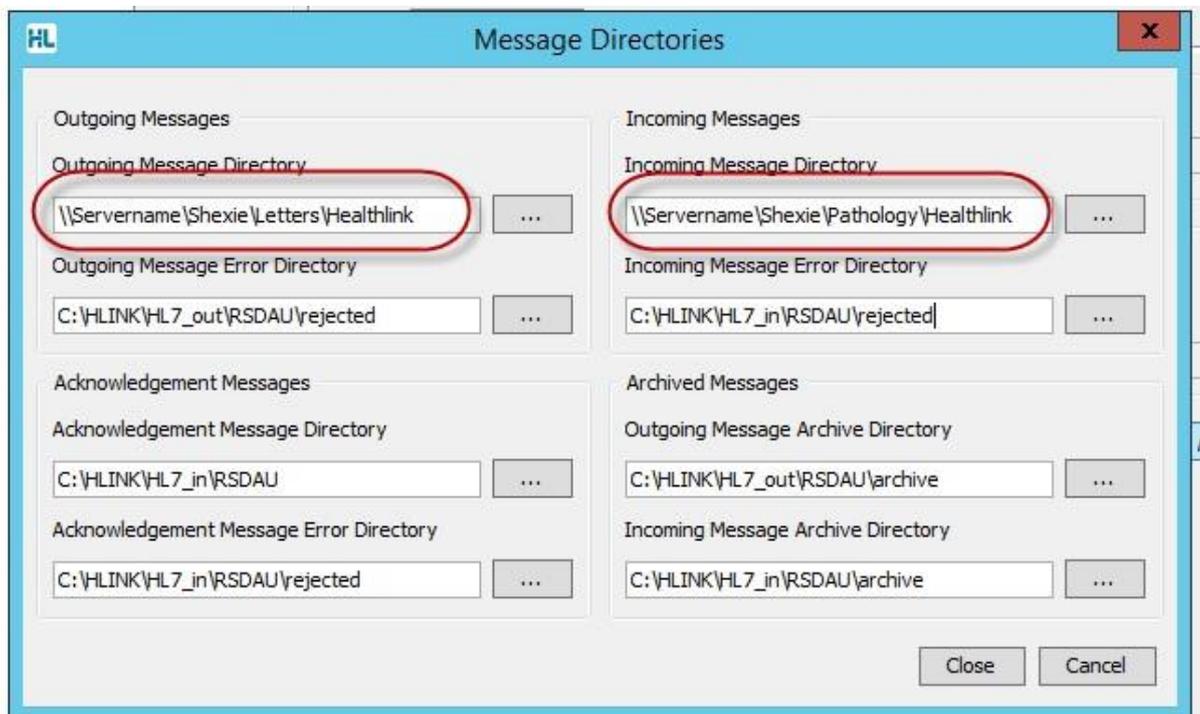

Integration Guide

2.4 RSDAU message configuration

Shexie is able to receive letters and Discharge Summaries as both RTF & PDF. The letters and Discharge Summaries can also contain hyperlinks and imbedded images.

The **HMS Advanced Options** configuration for the **RSDAU** uses **Outgoing Message Directory** \\Servername\Shexie\Letters\Healthlink and the **Incoming Message Directory** will be \\Servername\Shexie\Pathology\Healthlink

- 1- From in the **HMS Advanced Options**
- 2- Click on the **Message Types** tab and scroll down and highlight **RSDAU**
- 3- Click on the **Message Stores** tab and click **Edit/More**
- 4- The **Incoming and Outgoing Message Directory** are the only path that is to be changed.

- 5- This can be changed to the required \\servername\Shexie\Pathology\Healthlink path or you can browse to the shared folder by clicking on the  button.

** Shexie can now acknowledge RSDAU messages. Shexie export ACKs to the Outgoing RSDAU folder: \\Servername\Shexie\Letters\Healthlink

- 6- To save the changes click on **Close**.

On Healthlink Advanced options click File > Save All.

Integration Guide

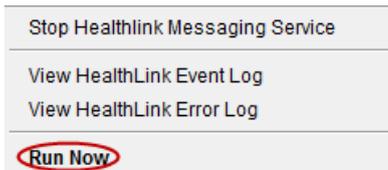

3. Testing Your Configuration

3.1 Generating Test Messages

- 1- Open the **HMS Advanced Options**
- 2- From the menu click on **Utilities>Test Message Generator**. The **Test Message Generator** window will appear.
- 3- Click on **Lab2** and then on **Generate Test Message** button.
- 4- To generate a RSDAU message click on **RSDAU** and then click on **Generate Test Message** button.

3.2 Making HealthLink Connect Manually

- 5- From the systems tray **right click** the Healthlink Icon  .
- 6- Left click on **Run Now** to make the manual connection.

- 7- A spinning “H”  icon indicates the Healthlink client has started its connection.
- 8- Once the “H” stops spinning, the Healthlink connection has been completed and the test messages are downloaded into their respective folders for **Shexie** to import.

Integration Guide

4. Checking for messages in Shexie

When Shexie detects results or letters are waiting to be imported from the \pathology\ directory an icon will flash in the Shexie application.

The screenshot shows the Shexie Medical System interface. A menu is open under 'Table Maintenance', with 'Pathology' selected. A sub-menu is displayed with 'Pathology Results' circled in red. The main window shows a patient appointment for Friday, 23 October, 2009, from 12:00 PM to 03:00 PM. A table of appointments is visible, including Mrs Sharon Roberto, Mrs Angela Campisi, Mr Ian Barron, Mrs Maria Cavallaro, Mr Unal Yildiz, and Miss Franca Sumera. The bottom of the screen shows navigation controls for 'Alter Date', 'View Week', and 'To Do List'.

Time	Appointment
12:00 PM	Mrs Sharon Roberto
01:00 PM	Mrs Angela Campisi
01:30 PM	Mr Ian Barron
02:00 PM	Mrs Maria Cavallaro
02:30 PM	Mr Unal Yildiz
03:00 PM	Miss Franca Sumera

Integration Guide

5. Setting up Shexie for sending HL7 Letters

Shexie can send HL7 letters in either RTF or PDF format. For best display in the recipient systems it is recommended that the PDF option be selected.

5.1 Configuration for Add/Edit Referring Doctor Details

Key entries in the Referring Doctors details for sending HL7 letters via Healthlink are:

The **EDI** field needs to be populated with the **recipients EDI address** (See below)

The **Letter Send Method** needs to show **HealthLink**

The **Electronic Send Format** needs to be set to **HL7**

It is recommended that the **HL7 Format** be set to **PDF** as most recipient systems support this format

Shexie Medical System
Copy Name/Address to Clipboard Send SMS

Update Referring Doctor Details

Title Dr. **First Name** Tony **Last Name** Bowden **Valid**

Salutation Anthony **Letters Send Method** Healthlink

Comments **Electronic Send Format** HL7 PIT

HL7 Format RTF PDF

EDI PMS3MEDD **e-Mail** **Print** Envelope Address Label Patient List

OK **Cancel**

5.2 The Shexie export directory

This path is always set by Shexie

Integration Guide

5.3 Shexie templates

The template has to be flagged as being electronic (or manual) but that does not mean they have to have 2 copies of the one template. This indicates to the system whether or not it is eligible to be sent electronically.

When Shexie is to dispatch the documents the system first checks to see what letters are flagged as electronic then it checks to see if the referring doctor the letter is addressed to is flagged to be sent electronically (and via which method). It then creates the file to be picked up by Healthlink. If the letter or the Dr is not flagged appropriately it will just print it out.

6. Appendix

6.1 A note regarding system paths

The system paths mentioned above correspond to network locations. The network locations will vary from site to site. It is best practice to use full network paths to browse to the HLINK folder location. The HLINK directory will need to be shared and users will need to have read/write permissions to it.

If you are unsure about the paths mentioned above or have any other queries, please call the HealthLink helpdesk on 1800 125 036.
