Breach events are attempts to start the car with a BAC above zero.

Transport has reviewed the image(s) captured by the interlock device for each event listed and confirmed it was the participant who blew in the device or there is no one in the image to discount it as being the licence holder.

To complete this review, refer to the customer's 'breach events' shown in this form.

Before the end of program review, please refer to the [Stage Three Fact Sheet for GPs](#) on our website and the national driver medical standards on the Austroads website www.austroads.gov.au.

Health professionals requiring more information on the Alcohol Interlock Program can contact (02) 6640 2821 and select option two.

Note: Anyone extended in the interlock program will need another medical end of program review after six months, regardless of the number of alcohol detections. This means there may be no breach events detected on the medical review.
