

Multi-Factor Authentication (MFA) with **Microsoft Authenticator**

For MyHealthLink Portal

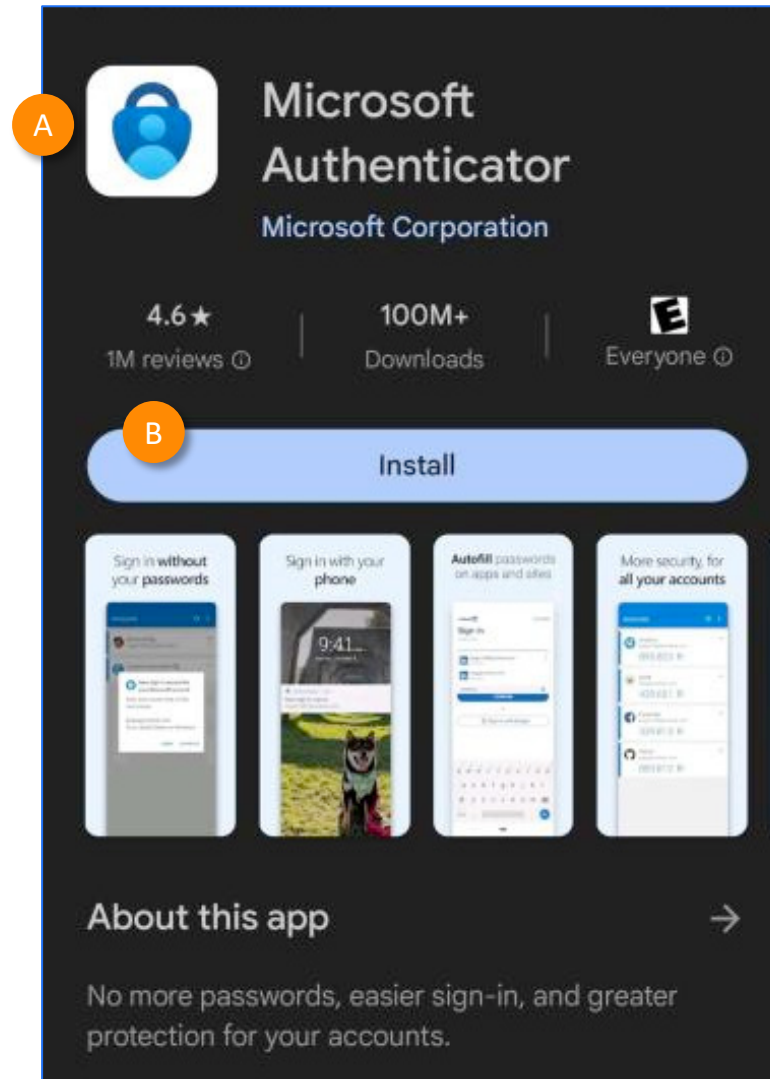

Multi-factor authentication (MFA) provides an additional layer of security to protect sensitive information and patient data. Setup is quick and significantly strengthens account security, helping ensure uninterrupted access.

HealthLink*

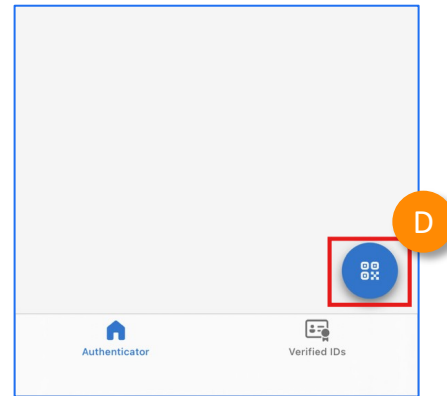

MFA with Microsoft Authenticator

- A** Open the Google Play Store (Android) or App store (IOS)
- B** Search for and Install the Microsoft Authenticator App.
- C** Once Installed, follow the on-screen steps to setup

MFA with Microsoft Authenticator

- D** Click the QR Code Scanner
- E** Login to the MyHealthlink Portal and enter your Username and Password. Click Submit
- F** Click “Set Up Now” in the MFA Enablement page

MFA with Microsoft Authenticator

G The MFA Setup page will show a QR Code to Scan.

H Scan the QR Code in the Google Authenticator App with your mobile device.

I Add the Verification Code generated by your Authenticator App and click “Confirm & Enable MFA” to login.

Important:

Do not share the verification code with anyone

G

Boost Your Security

Setting up a mobile authenticator adds an extra layer of protection.

1. Scan the QR code with Google/Microsoft Authenticator.
2. Enter the 6-digit code below to finish.
